---

Highly skilled Full Stack Web Developer with a passion for crafting dynamic and user-friendly applications. Dedicated to leveraging expertise in front-end and back-end technologies to drive innovation and enhance user experiences. Seeking opportunities to contribute technical proficiency and creative problem-solving abilities to a dynamic development team. Committed to staying abreast of emerging trends and technologies in the ever-evolving web development landscape.

**TECHNICAL SKILLS and SOFT SKILLS**

---

**Technical Skills:**

- **Programming Languages:** PHP, JavaScript ES6, Java, C, C#, Flutter
- **Markup Languages:** HTML5, CSS3.
- **Database:** MySQL
- **Version Control:** Git/GitHub

**Soft Skills:**

- Analytical Thinking, Critical Thinking, Team Work, Communication, Enthusiasm, Creativity

**PERSONAL PROJECTS**

---

[kidsworld.netlify.app](http://kidsworld.netlify.app)

Developed an e-commerce web application using HTML, CSS, and JavaScript. It consumes the data via API, then displays the data. It also has a fully functional cart, and client-side products filters.

[cwconverter.netlify.app](http://cwconverter.netlify.app)

Developed a price converter that I used for work using JavaScript and CSS. It takes the conversion rate then stores it locally for future sessions, it also has the option to add a discount to the converted price.

## PROFESSIONAL PROJECTS

---

[poywin.com](http://poywin.com) - Ploywin Digital Marketing Website

Developed a comprehensive informational website for Ploywin, a client in the digital marketing sector. Utilized JavaScript, HTML, and CSS to create a responsive and user-friendly platform. Focused on implementing efficient and clean code to ensure optimal performance across various devices and browsers. Collaborated closely with the design team to bring their vision to life and incorporated SEO best practices to enhance online visibility. This project showcased my ability to deliver robust web solutions that meet client objectives.

[pregnacaree.000webhostapp.com](http://pregnacaree.000webhostapp.com) – Pregnancy Monitoring System

I developed "PregnaCare" a pregnancy monitoring system using PHP and JavaScript. The system allows pregnant women to submit daily vital results such as blood pressure and temperature, which are monitored by healthcare providers. It features an integrated ChatGPT-powered chatbot for patient interaction and support, alongside secure messaging between patients and doctors for efficient communication of medical concerns. Pregnant women can maintain a comprehensive medical profile including conditions like diabetes or hypertension. Charts.js is employed to visualize patient-submitted test results, aiding in trend analysis. The system also supports patient upload and doctor review of laboratory test reports, enhancing diagnostic capabilities. An admin portal facilitates user management and oversight, enabling seamless addition and management of users and access to patient health data.

## EDUCATION

---

**Lebanese International University, SALOUMI, LEBANON**  
B.S. in Computer Science

OCT 2021- 2024

## EXPERIENCE

---

**Baby World, BEIRUT, LEBANON**

NOV 2021 - PRESENT

### Assistant Manager

- Provided exceptional customer service by assisting customers in finding suitable toys and games based on their preferences and age group.
- Operated the cash register and processed transactions accurately while adhering to store policies and procedures.
- Addressed customer inquiries and concerns promptly and professionally, resolving issues to ensure a positive shopping experience.

- Assisted in receiving and unpacking merchandise shipments, verifying contents, and ensuring accurate documentation of received items.
- Managed their online shop, by handling customers' requests and complaints. Also, processing the customers' orders and dispatching them.

## **Freelancer**

DEC 2023 – PRESENT

- Developed custom full-stack web applications from concept to completion, utilizing PHP, JavaScript, HTML, CSS, and MySQL database technologies.
- Collaborated closely with clients to understand project requirements, provide technical expertise, and deliver tailored solutions that meet their business objectives.
- Designed and implemented responsive user interfaces and interactive features, ensuring optimal performance and compatibility across various devices and browsers.
- Integrated third-party APIs and libraries to enhance functionality and streamline processes, such as social media platforms, etc.
- Implemented robust backend systems to manage user authentication, data validation, and secure access controls, prioritizing data integrity and system security.
- Conducted thorough testing and debugging of web applications to identify and resolve bugs, optimize performance, and improve user experience.
- Provided ongoing maintenance and support services, including troubleshooting issues, implementing updates, and addressing client feedback to ensure continued functionality and performance.
- Leveraged version control systems, such as Git, to manage code repositories, track changes, and collaborate effectively with team members and clients.
